

**Job Role:** Site Chemist

**Location:** Hinckley, Leicestershire

**Job Type:** Full time

### **Who We Are**

GRG provides infrastructure and services for all forms of solid, hazardous, liquid, and inert waste in large and small economies, be they from public or commercial sources, with the aim of diverting waste from landfill and maximising the sustainability credentials of all waste streams it receives. Today, the GRG group employs over 200 people and operates in Guernsey, Jersey, the Cayman Islands and the UK, and has become a UK market leader for hazardous and specialist waste. All operating companies in the UK are owned by GRG Waste UK, a subsidiary of the parent company GRG, and is made up of 4 companies, including BKP Waste & Recycling, Greenway Environmental, Chloros Environmental, and Novum Waste Recycling, that work in unison to offer a wide range of services.

Greenway are experts in the hazardous waste industry, handling a wide range of hazardous and non-hazardous waste streams, including corrosive liquids, paints and solvents, contaminated rags, oil sludge and filters, aerosols, oxidisers, WEEE and resins. Greenway operates a Total Waste Management division which offers a full-service solution from site visits and sampling to container supply and transportation. Greenway pride themselves in offering industry-leading response times for their services and turning waste into energy, through innovative and sustainable solutions.

We are currently looking for a Site Chemist to join our closeknit team at our site in Hinckley. This position will require you to work closely with the Senior Site Chemist and Site Supervisors to control the day-to-day operational aspects of the site. This is a hands-on role and will involve preparation of inspection of incoming waste loads, some preparation of outgoing waste loads, identification of accurate and correct disposal routes for all waste streams, raising non-conformance reports, bulking and some laboratory work. Training and support will be provided wherever necessary.

### **Main duties and responsibilities**

- Ensuring full compliance with the site permit
- Waste acceptance inspection and testing to determine identification and disposal/recycling routing
- Compliance with HSE segregation guidelines
- Safe operation of the site
- Waste re-packaging/bulking
- Raising any non-conformances within agreed time frames
- Receipt of paperwork onto the stock tracking/EA reporting log, and with the invoicing admin team, all to pre-agreed timeframes
- Laboratory testing of waste samples
- Safe use of FLT's
- Periods of deputising for the Senior Site Chemist
- Preparation of Outgoing Loads to other waste facilities

### **About you**

Minimum of a Bachelors degree in Chemistry or related subject.

**What We Can Offer You**

- Health & wellbeing programme
- Private dental insurance
- Private medical insurance
- Company pension
- Free on-site parking
- £24,675.00-£27,825.00 per year salary
